### **DETAILED ACTION**

Acknowledgement is made of the Appeal Brief filed 7/1/2009.

#### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

**Claim 16** is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The “computer readable medium” in this case can be interpreted both as a tangible entity (such as RAM, DRAM, hard drive, etc) or a non-tangible entity (such as a signal, carrier wave, etc). Therefore, the claim is considered non-statutory.

#### ***Claim Objections***

**Claim 16** is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form or rewrite the claim(s) in independent form. See also MPEP § 608.01(n), “Infringement Test” for dependent claims. The test for a proper dependent claim is whether the dependent claim includes every limitation of the parent claim. The test is not whether the claims differ in scope. A proper dependent claim shall not conceivably be infringed by anything which would not also infringe the basic claim.

***Allowable Subject Matter***

**Claim 1-15 and 18-22** are allowed.
